

Bytek Corporate Backgrounder

Company

Bytek Systems, Inc., located in Atlanta, Georgia, is a leading provider of innovative, secure, online subscription services for home and office. Employing its patented mobile desktop networking technology, called Diino® (www.diino.com), Bytek offers individuals and businesses an easy, powerful, cost-effective and secure way to store, access and share files. Bytek Systems provides access to information with all of the benefits of a networked environment - anytime, anywhere access to information that is easily shared and fully protected. Bytek Systems, Inc. and Swedish-based Bytek Systems AB are wholly owned subsidiaries of Swedish investment company, AB Novestra.

Technology

Diino is a combination software application / online service that allows users to quickly and economically create their own virtual private networks from any internet-connected PC running Microsoft Windows. Diino account users can store, access, and share files; collaborate with others in remote locations; organize and play music files; and distribute and receive large files. Diino user accounts include the Diino user interface, Diino music-player, virtual networking with up to five concurrent users, unlimited shared folders, one Diino mail account, Mobile phone access, Diino blog, 2,048-bit encryption and 10 GB of workspace, which can be upgraded to 100 GB. (Free accounts are limited to 100 MB).

Management

David Stapleton - President, Bytek Systems Inc. Inc., North and South America
